Subject: Passaic Workspace invitation notice

Alice and Jay,

Please expect an invitation similar to the below for access to an Oxy webtransfer site that I'd like to test for delivery of larger electronic documents. The site is hosted by Oxy and managed by Lisa Waskom, a Glenn Springs project manager in Houston reporting to me, so you will see reference to her within the email and on the site. We are testing several platforms for longer-term use to fulfill the goals specified the PMP, however due to the potential size of upcoming deliverables, I wanted to ensure we at least had a current and convenient method of delivery for immediate use as necessary.

Once you've established your independent log-in, you should have access to a folder called "GSH to EPA Deliverables", hosted and shared by Lisa. If we don't have any firewall issues between the Site and respective State and Federal access, we may proceed to populate the site further and open access to others (e.g. Louis Berger folks) as conceptually discussed with Alice. You will see the official communication from me via email similar to the past on any delivery regardless, which will be the notification that a document has been posted for submittal.

Thanks.

Juan
